

AMENDMENTS TO THE SPECIFICATION

Please replace the last paragraph on page 10 with the following amended paragraph:

The electrical connector ~~4A~~5 is further covered by molding resin 32, such as polyvinyl chloride, as its secondary molding, thereby forming the product into a shape.

Please replace the 3rd full paragraph on page 18 with the following amended paragraph:

An electrical connector ~~51D~~ includes an insulation covered electric wire 40, comprising a conductor 41 covered with an insulator 42, ~~and an insulation covered electric wire 40~~. The conductor 42 at the end portion of the covered electric wire 40 is removed to expose a conductor 41. The end of the exposed conductor 41 has a solderless terminal 51 crimped thereto. Together with the solderless terminal 51, the end of the covered electric wire 40 is inserted into and fitted in a connector housing 60.
